## Clearcoats

A complete products range  
of high performance.

Caring about the differences!

P0051-12/2019

**NoLimits Efficiency (15-25-35°C)**

**MC404 MACROFAN AVANTAGE UHS CLEARCOAT**

Dir. 2004/42/CE/IIb (d) (420)

**2:1 HI-Tech UHS clearcoat**

This is suitable when you require the maximum flexibility under all application conditions with a high-quality aesthetical aspect but also quick drying result.

- Easy application (also at T >30°C)
- Very good aesthetical aspect
- Quick drying
- Excellent hardness

It utilises hardeners MACROFAN UHS HARDENER (MH110-115-120)+ MH404 MACROFAN AVANTAGE UHS HARDENER + MT404 MACROFAN AVANTAGE ADDITIVE.

**Rapid profit**

**MC405 MACROFAN POWER UHS CLEARCOAT**

Dir. 2004/42/CE/IIb (d) (420)

**UHS 2:1 clearcoat with POWER technology.**

It is the ideal product when the maximum profit is demanded in term of aesthetical aspect and application.

- Fast application and air drying (5 min. at 60°C)
- Flexibility in use
- Very good polishing
- Excellent final aspect

Use MACROFAN UHS HARDENERS (MH100-MH110-MH115-MH120) + MT405 MACROFAN POWER ADDITIVE.

**Very good yield**

**MC420 MACROFAN UHS CLEARCOAT**

Dir. 2004/42/CE/IIb (d) (420)

UHS 2:1 clearcoat. It is the ideal product for all type of repairs when the maximum result is expected in term of quality/price.

- Very high yield
- Good drying
- Easy application
- Good final aspect

Use MACROFAN UHS HARDENERS (MH100-MH110-MH115).

**Wide-ranging use**

**MC421 MACROFAN PLUS UHS CLEARCOAT**

Dir. 2004/42/CE/IIb (d) (420)

High technology 2:1 UHS clearcoat. Suitable when the greatest wide-ranging spectrum of use is required for application methods and for repair type with high aesthetical performance.

- Easy application.
- Wide-ranging spectrum of use (from spot repair to complete painting) and drying times.
- Easy use.
- Excellent aesthetical aspect (with standard hardener).

Use MACROFAN UHS HARDENERS (MH100-MH110-MH115-MH120).

**Highest protection and quality**

**MC450 MACROFAN AUTOGARD UHS CLEARCOAT**

Dir. 2004/42/CE/IIb (d) (420)

UHS 2:1 clearcoat based on special polymers giving antiscratch characteristics and an excellent aesthetical aspect.

- Excellent scratch resistance
- "Reflow" effect (superficial abrasions tend to disappear)
- Excellent aesthetical appearance
- Easy application

Use MACROFAN UHS HARDENERS (MH100-MH110-MH115-MH120).

**No consumption and maximum rapidity**

**MA380 MACROFAN AIRTECH UHS CLEARCOAT KIT**

Dir. 2004/42/CE (d) (420)

UHS 1:1 clearcoat with AIR Drying technology. It is ideal for partial repairs with no drying in the spray booth, when the highest energy saving and high productivity are required.

- Simple preparation and application
- Excellent flow and aesthetical aspect
- Fast drying (polishing after 2h at 20°C)
- High film hardness and resistance

It is available only in kit with its specific hardener MH380.

**Ready for use matt clearcoats**

**09890 MACROFAN HS 2000 MATT**

**09896 MACROFAN HS 2000 SAT**

Dir. 2004/42/CE/IIb (e) (840)

HS clearcoats with different gloss (about 10 and 30 gloss) mixable with each other to obtain in-between gloss.

They are especially suggested to paint car/motorcycle parts, also plastic parts.

- Uniform matt or satin aspect
- Excellent flexibility
- Easy application
- Very good outdoor resistance

Use MACROFAN UHS HARDENERS (MH100-MH110-MH115-MH120).

**Fast for indoor**

**01230 ACRIFAN 1K CLEARCOAT**

Dir. 2004/42/CE/IIb (e) (840)

One-pack ready for use acrylic clearcoat, for indoors

- Very easy application
- Fast drying
- Very good polishing
- Good gloss

Also available in aerosol version: EL090 ENERGY SPRAY LINE CLEARCOAT.
